Samuel Allen Gelacio

Automation Developer
Santa Rosa City, Calabarzon, Philippines

Summary

As a dynamic and results-driven automation developer, I specialize in creating efficient, innovative web and software solutions that seamlessly integrate with business objectives. With a solid foundation in full-stack development and a strong focus on modern frameworks like React and TypeScript, I have built a diverse portfolio of projects, ranging from web-based applications to complex backend integrations.

My passion for coding goes beyond mere implementation—I'm always eager to learn and explore new technologies, particularly in the realms of automation, mobile development, and data-driven applications like Power BI. Whether it's developing custom solutions for domain management, creating dynamic frontend experiences, or embedding analytics reports, I approach every challenge with curiosity and a drive for excellence.

Currently, I'm exploring new opportunities to apply my skills in cloud-based platforms, API integrations, and intelligent systems like Dataverse and OCR. In my role as an automation developer for a consulting firm, I have honed my problem-solving abilities, developing robust solutions for both client and internal projects.

Outside of coding, I'm an avid learner who enjoys diving into topics related to the universe, complex logic, and emerging trends in IT and software development. My goal is to continuously grow as a developer and leader in the tech industry, delivering solutions that not only meet technical specifications but also drive meaningful business impact.

Let's connect if you're looking for someone who can bring fresh ideas, technical expertise, and a collaborative mindset to your team!

Experience

CGI
2 years 7 months

Service Consultant
July 2024 - Present (4 months)
Taguig, National Capital Region, Philippines

Associate Consultant
July 2023 - June 2024 (1 year)
Philippines

His duties will primarily revolve around building software by writing code, as well as modifying software to fix errors, adapt it to new hardware, improve its performance, or upgrade interfaces. He will also be involved in directing system testing and validation procedures, and also working with customers or departments on technical issues including software system design and maintenance.

Junior Consultant
August 2022 - July 2023 (1 year)
Taguig, National Capital Region, Philippines

His duties will primarily revolve around building software by writing code, as well as modifying software to fix errors, adapt it to new hardware, improve its performance, or upgrade interfaces. He will also be involved in directing system testing and validation procedures, and also working with customers or departments on technical issues including software system design and maintenance.

Junior Automation Developer
April 2022 - July 2022 (4 months)
Taguig, National Capital Region, Philippines

He is a Junior Automation Developer Intern at CGI Philippines Taguig Office, he worked on 2 projects while in his Internship months. His duties working as a junior developer revolved around building software by writing code, as well as modifying software to fix errors, adapt it to new hardware, or upgrade interfaces. He also helped on testing and making mockup designs for the website projects that he was assigned to.

Exceed Web Solutions
Web Developer
February 2021 - October 2021 (9 months)

He worked as a part timer Frontend Developer in this company Exceed Web Solutions. He implements designs that were given by the designers so that the

design will be viewable in website form. he like to code stuffs and him working here helped him to handle more workloads and more knowledge about CSS, HTML and JavaScript. Working in this company showed him new knowledges and help him see how workloads are distributed to each employee.

Protel
Appointment Setter
March 2019 - January 2020 (11 months)
Calabarzon, Philippines

He worked as an Appointment Setter in Protel Company for almost 11 months as full time while studying at PUP Santa Rosa Campus to suffice his academic needs. His job is to do outbound calls then lead the hot contacts to the local agent of and Insurance company that was assigned to him. He also answers some inbound calls if they scheduled callbacks for that Insurance Company.
